

REDCap

Summary

Research Electronic Data Capture (REDCap) is a secure web application used to collect research data, create robust surveys/forms, and manage online databases. Make use of REDCap survey features such as automated survey invitations, branching logic, field validation, and more. Developed by Vanderbilt University, REDCap is a consortium-based application that is free to use by the UT Dallas community. [Visit our Data Management website](#) to learn more.

The Data Management team provides REDCap office hours throughout the week via Teams; refer to the schedule below. Come ready with questions, and one of our REDCap experts will be happy to assist.
